Meseta Capsules System: the closed system with biodegradable capsules

Meseta coffee presents Meseta Capsules System, the first Vending system with biodegradable capsules in patented format, for an excellent espresso coffee.

The closed Meseta Capsules System not only makes an excellent espresso coffee, but also guarantees the Vending operator:

- Maximum **confidence** in client management
- Excellent **profitability**
- **Biodegradable** capsule*
- Guaranteed blends from the **gruppo Co.ind**
- An exclusive blue coffee machine, specially for the Vending market, with a unique, distinctive design
- Entirely Italian-made product
- **Patented** system

Meseta Capsules System is one of its kind on the market; unique – just like the feeling of satisfaction only its clients can enjoy.

* MCS capsules are biodegradable pursuant to EN ISO 14855 standard and also to the DIRECTIVE 94/62 EC. To dispose of the capsules correctly, always consult the regulations regarding waste separation in your town of residence.

Meseta Capsules System: flavour and aroma in unique, quality blends

The taste and aroma of the **coffee blends** contained in the MCS capsules are guaranteed by a series of **specific quality** controls conducted throughout each and every phase of the production process. **Meseta**, in fact, is a trademark of the **Co.ind group**. Founded in 1961, Co.ind is known today as one of the leading Italian roasting companies, with over 6,500 tons of coffee roasted every year.

The MCS coffee blends available are:

Espresso: a blend of great character and roundness, achieved thanks to the expert combination of Arabica from the Brazilian plateaus and fine Robusta from India, Africa and the Far East.

Decaffeinated: an excellent decaffeinated coffee which, thanks to our skilful roasting methods, has all of the aroma and taste of a classic coffee.

Lungo 100% Arabica: a blend of rare Arabica beans. The special roast enhances the subtle flavour and mild aroma without compromising the body of this typically Italian coffee.
